

The natural choice for response services

Always on the alert

Keyholding and patrol team

First Security provides 24/7 365 assistance with key holding, alarm response and mobile patrol services. By safeguarding a set of your keys, in accordance with industry keyholding standard BS 7984 we are on-call for any of the emergency response services you require.

We protect your people and places by securely holding keys to your premises and responding to an alarm call on your behalf. All our drivers undergo familiarisation training with your individual instructions and we regularly undertake risk assessments of your site.

By visiting your premises on an ad-hoc and routine basis as required, we provide a visible deterrent at a lower cost to employing a full time security officer. This service is particularly valuable at nights and weekends when your building is likely to be unoccupied.

Our central communications hub

Our keyholding and patrol teams are coordinated and monitored by our National Communications Centre 24/7, 365 days a year. Handling over 7,000 calls per week, we can deliver a rapid response service for all our customers to provide immediate protection and short term cover.

Additional value adding support:

- Business continuity planning
- CCTV installation and maintenance, including remote monitoring and visual verification
- Covert security operatives and store detectives
- Executive protection services
- GPS tracking and control of vehicles
- Retail and supply chain loss prevention support
- Security consultancy
- Specialist security installations
- Surveillance and counter surveillance services
- Training and development for client security teams
